Wild Commophora myrrha (Myrrh Tree)

Base: Vegetable Glycerine, Purified Water, Organic Acacia Gum

**D**ENTIZYME™ is the initial approach to an oral care process designed to assist your efforts to achieve a beautiful, confident smile. During brushing with this versatile product, it thoroughly cleans teeth, gums, and tongue with a non-sudsing cleansing action that helps to remove dental plaque and surface stains. It instantly deodorizes oral tissues and teeth.

# Natura

DENTIZYME™

100% Natural  
Teeth and Oral  
Tissue Cleansing

## Powerful Teeth, Gums, and Tongue Cleaning

- ❖ *Dentizyme*™ has a potent cleansing action that helps to keep gums tight. It instantly freshens breath, and removes unsightly plaque and stains from teeth surfaces.
- ❖ Coffee drinkers, smokers, anyone with teeth stains benefit from its strong action.
- ❖ It cleans so well that some dentists strongly recommend it to their patients.
- ❖ Using *Dentizyme*™ by itself offers fantastic oral cleansing and cosmetic beauty benefits, but using it as part of an oral care system with *Lavadent*™ yields even greater advantages of whitening and overall dental hygiene/beauty.
- ❖ Used with *Lavadent*™, these products create the formation of a “Clean Shield” that may provide a barrier against teeth staining and other factors that can mar dental beauty and disrupt the effectiveness of your oral hygiene.
- ❖ *Dentizyme*™ is an overall oral care product, whereas *Lavadent*™ offers stronger plaque and stain-removal whitening without chemical agents while helping to create a beneficial oral environment for dental remineralization.
